

Building Utility: Tech. Room P-331

P-Engineering design full Technical Rooms based on prefabricated Units and General Installations, and we handle these as a EPCM Contractor on behalf of our clients.

- Steam and Condensate
- District Heating or Boiler Installation
- Central Heating
- District Cooling or Chillers
- Central Heating
- Expansion and Make-up Systems
- Water Supply and Water Treatment
- Hot Tap Water Production and Distribution
- Mixing Loops for Floor Heating
- Compressed Air and Nitrogen

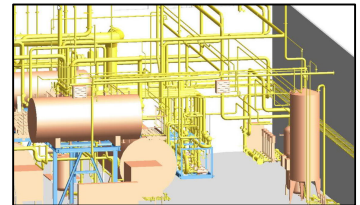

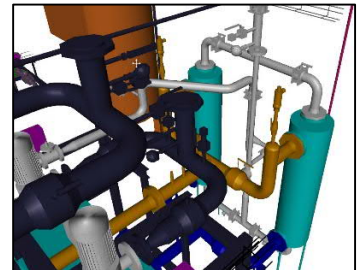

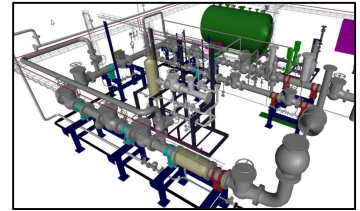

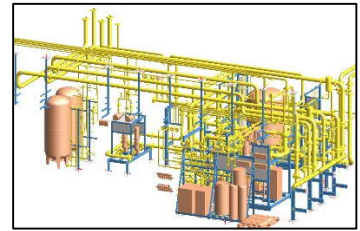

P-Engineering design/sizes all

- Piping EN 13480
- Equipment – Vessel, Heat Exchangers, Pumps, Control Valves.
- Electrical MCC, Cabling etc.
- Steel Structures and Pipe Support
- BMS, Instrumentation etc.

For all areas manufacturing drawings will be created – Piping Isometrics, Support, MCC Single Line Diagrams Details etc.
